

**Amendments to the Specification:**

*Please amend the paragraph (section) beginning on page 11, at line 11 as shown below:*

In an alternative embodiment shown in Figure 4, a glove probe 112 is provided with a somewhat longer index finger phalange portion 107 so that it is about the same length as, or as shown, longer than, the index finger phalange portion 7 of glove probe 12. Preferably, the index finger phalange portion 107 of the glove probe 112 is about 2-4 centimeters longer than the index finger phalange portion 7 of the glove probe 12 shown in Figures 2 and 3. In addition to sensors 40a-j, glove probe 112 further includes EKG sensor 40k disposed above sensor 40c at the tip of index finger phalange portion 107. Sensor 40k is provided to record the V6 lead directly, thereby alleviating the need to derive the V6 lead by computation/~~deviation~~ derivation from the V1-V5 leads.
